	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Make the different lists (to be read, currently reading, finished) ● Ask for user input to add to the lists ● Save data locally to json files ● View all lists in the terminal	**Schedule - (For V2.0+)** ● Be able to move books between the lists ● Choose random book to read from list of books to be read ● Rating books that are finished
Not Important	**Delegate - (Use a library)** ● Tracking exactly when a book is finished ● Formatting it in a convenient way ● Tracking reading statistics (percent completed)	**Delete - (Cut it)** ● Scraping data from sites such as Goodreads ● Build a GUI ● Connect to external APIs
